Sorry, it was terrestrial EECs that were 99.9% incorporation.

Deliberative Process / Ex. 5

Hi,

I was thinking pull a couple of items from the 2015 PRA –

Primary risk is for birds and mammals consuming granules (1 granule can cause mortality). Numerous incidents involving mortality from accidental or misuse of aldicarb

Under the current label scenarios modeled for EECs, most aquatic organism acute and all chronic RQs exceeded all LOCs for all registered labeled uses of aldicarb.

I think it could be helpful....we will pull from existing documents and keep it to a couple of points. I've cc'd the team.

Thanks,
Amy

Hi Debra,

Would you like us to prepare a couple of bullets on the eco risk picture, to more fully round out the risks for aldicarb?

Thanks,
Amy

Hi Amy,

Thank you for stopping by this morning. Here is the initial draft of the one-pager I was scrambling to draft yesterday.

Any thoughts or comments are appreciated. I will also keep you in the loop for what Dan and Marion have to say.

Thanks,
Debrab

Hi Dan / Marion,

Attached is the quick one-pager that I was able to pull together yesterday. Please let me know if / how you want this edited and/ or any information that you feel is missing for this exercise.

Thanks.
Debra
